Subject: RE: BBDR?

Kenny:

No, there will hopefully be no discussion on the BBDR modeling. I can't think of what else we could say if there were to be one! I am hoping you can also contribute to the discussions on the second day, pertaining to interpretation of the epi data for leukemia, particularly that of using different exposure metrics and their uncertainties.

Ravi.

To: Subramaniam, Ravi **Subject:** RE: workshop

Ravi,

Attached are my draft slides for the Formaldehyde Workshop. My draft comments are also included. Please don't share this with anyone else. I would like any thoughts you have to share regarding this material. I am trying to keep my talk very simple and focused on the "fatal flaw" in the bottom-up approach.

I have discussed the workshop with Tom Starr and we have agreed to share information before the workshop.

The agenda on the web so far seems very general, and I don't see any discussion planned of BBDR modeling. Do you expect any?

I tentatively plan to be at the RDC in Hyattsville next week starting on Monday but my plans may change. I have reservations Sunday-Thursday at the

Embassy Row 2015 Mass. Ave. 202-265-1500

It would be great to get together with you if we have chance.

Regards,

Kenny

Hi Kenny:

I understand they are likely to postpone the formaldehyde workshop by a month although decision may not have yet been taken. Did the contractor straighten out the communication regarding your role with you?

Are you in Hyattsville, MD now? If so, it would be nice to meet.

Ravi.
